Computer Cabinets

STEELSTRONG BY VULCAN INDUSTRIES

VULCAN INDUSTRIES

Built to withstand harsh environments, the workstation protects your computer from dirt and dust as well as physical abuse and tampering. Workstations are made of 18- to 20-gauge steel, and the compartments and pull-out keyboard tray include a CAM lock and two keys for added security. The top compartment has a PETG window that shields your monitor while providing a clear view of the screen. All units include wiring and ventilation cutouts. Mobile workstations include four 4" diameter casters (two with brakes) for easy mobility and ship assembled.

Mobile Half Rear Door Unit – #1012793

The bottom compartment contains a shelf that is adjustable in 2" increments to accommodate your CPU and printer. The cabinet includes removable cutouts for installation of the optional ventilation fan.

Mobile Full Rear Door Unit – #1012928

The bottom compartment contains a full-width shelf that is adjustable in 2" increments. The cabinet has a full back access door for easy hookups and a fan/filter assembly inside to clean the air and provide a positive air pressure to keep contaminants out.

Stationery Table Top Unit – #1013251

Each unit includes adjustable levelers.

Item #	Outside Dimensions	Shelves Adjustable/Fixed
1012793	62H x 26W x 24D	1/1
1012928	64H x 26W x 24D	1/1

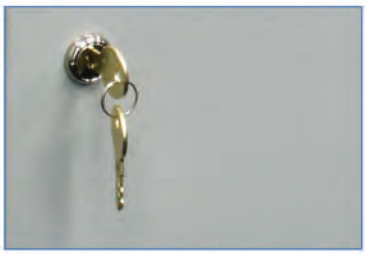
Features

STEELSTRONG BY VULCAN INDUSTRIES

VULCAN INDUSTRIES

The turn of a handle locks the door at three points to ensure smooth closure and maximum security.



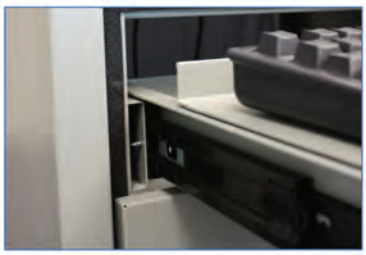
All computer cabinets feature CAM locks to secure the drawers and doors.

Mobile bookcases and storage units are equipped with 5-inch plate casters, two of which are locking.

Many cabinets include sturdy leg levelers that can be adjusted to fit your needs.

Inset tab allows the locking door to close "over" the other for increased security.

Computer cabinets feature louvers to improve air circulation and prevent overheating.



Cabinet drawers glide open easily with the full-length suspension system that includes an auto-locking feature in the open position.

Double handles allow easy opening and closing of the dual swing-out doors.

Cabinets include a raised base to keep contents from dust and moisture on the floor.

Adjustable shelves can be raised and lowered in two-inch increments.

Doors are reinforced to provide rigidity and reduce vibration when opened.

The industrial model computer cabinet includes an intake fan to provide positive air pressure that helps to keep out contaminants. Fan is optional on the standard models.

Packaging

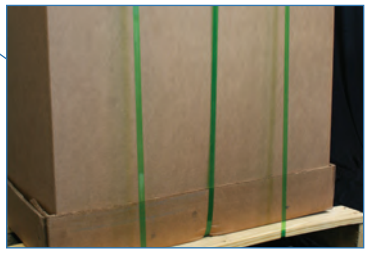
STEELSTRONG BY VULCAN INDUSTRIES

VULCAN INDUSTRIES

"No stack" cone signals that items should not be stacked on top of the carton by transit company.

Prominent barcodes and content labels offer peace of mind throughout the shipping process.

All corners and edges are protected with corrugated, shock-absorbent inner packaging. This creates an air-cushioned gap to prevent shipment damage. The outer carton is constructed of grade 48 ECT corrugate.



Durable strapping secures each unit to a custom-sized pallet.

All pallets are sized to fit to prevent cabinet overhang and eliminate shifting during shipping.
